MEDICAL REPORT

DIAGNOSES:

1. Down syndrome, trisomy 21.
2. Congenital heart disease, status post repair.
3. Right-sided sensorineural deafness.
4. Esotropia and hyperopia, wearing glasses.
5. Global developmental delay with speech delay.

CHIEF COMPLAINT & BRIEF HISTORY:

Hamed is a 6-year-old male patient who is known to have Down syndrome and he has the above mentioned problems. He has developmental delay, mainly speech and some elements of motor delay, attending Zayed Higher Organization plus a private school with a shadow teacher. The child is able to feed by himself. He is toilet-trained.

Regarding his development:

Gross motor: He walks, runs, and can climb the stairs up and down.

Fine motor skills: He has a mature pincer grasp but needs more training, scribbles, and can draw a line and a circle.

Speech: He can speak up to 20 words but not able to formulate full sentences, 25% of his language is not clear.

Socially: He plays with other kids and siblings.

Behavior: He is not showing any autistic behavior, not hyperactive, not aggressive.
